

#MoreNowThanEver

Dear Chancellor Friedrich Merz,
Dear Federal Ministers Lars Klingbeil and Reem Alabali-Radovan,

As #OneWorldOneFight, we need a fully resourced Global Fund #MoreNowThanEver!

Germany has been a major supporter of the Global Fund to Fight AIDS, Tuberculosis and Malaria (Global Fund) since the partnership was founded and is the fourth largest public donor overall. To date, Germany has contributed over €5.3 billion.

As communities living with, affected by and/or vulnerable to HIV, TB and malaria and civil society globally and across Africa and Asia-Pacific, we express our deepest appreciation to Germany which enables our collective fight against HIV, TB and malaria towards ending the three diseases by 2030.

The Global Fund is the world’s largest multilateral financing institution of global health grants in low- and middle-income countries. According to the [Global Fund Results Report 2025](#)¹, as of the end of 2024, the Global Fund partnership has saved over 70 million lives and cut the combined death rate from AIDS, TB and malaria by 63% since its establishment in 2002. By the end of 2024, the Global Fund partnership had put 25.6 million people on HIV antiretroviral treatment, treated 7.4 million people for TB and distributed 162 million insecticide-treated mosquito nets to fight malaria. As of mid-2025, the Global Fund partnership has invested US\$69.9 billion to counter the threats of HIV, TB and malaria, enhance global health security and pandemic preparedness, and strengthen health and community systems in more than 100 countries.

The effectiveness of the Global Fund, through strengthened procurement and supply chains, health and community systems, promotion and protection of human rights and gender equality, ensured that key, marginalised and vulnerable populations of HIV, TB and malaria have continuity of prevention and testing services and life-saving treatment. Additionally, the Global Fund is also doing important work to address antimicrobial resistance (AMR) which is a huge global threat. The investments of the Global Fund into screening, early diagnosis, treatment, prevention, care and support contribute towards reducing resistance to medicines for HIV, TB and malaria and complement investments into health and community systems strengthening efforts to track and diagnose new pathogens and disease variants.

However, the past few years have been difficult for countless communities affected by climate change, conflict, and attacks on human rights, gender equality and civic space, which resulted in unprecedented challenges and deepened inequities across the globe. Invariably, these challenges have put the poorest and most marginalised people at greater risk of deadly infectious diseases. More now than ever, investments in the three diseases must continue, to stop new infections, prevent new deaths, and save lives in the face of emerging threats and colliding crises.

As communities and civil society living with and/or affected by the three diseases, we are committed to the Global Fund partnership at the global, regional and country levels to ensure our fight against the three diseases – including building resilient, equitable, quality, and inclusive community health systems centred on human rights and holistic care – is continued and protected.

The Eighth Replenishment was launched on 18 February 2025 for the funding period 2026-2028. The virtual launch was co-hosted by South Africa and the United Kingdom. At the launch of the Eighth Replenishment, the Global Fund called for an investment of **US\$18 billion** to save up to 23 million lives; avert up to 400 million

¹ The full report is available at <https://www.theglobalfund.org/en/results/#download>

infections or cases; deliver a return on investment of 1:19, resulting in US\$323 billion in returns over 2027-2029; **close the equity gaps and accelerate service coverage**; **reduce global inequality in life expectancy** by 7% between 2023 and 2029; **catalyse improved and more targeted domestic investments** for HIV, TB, malaria and health and community systems; **improve resilience to climate change** to safeguard progress against HIV, TB and malaria; and **save US\$42 billion in primary health care costs**, bringing the total savings since 2002 to US\$145 billion.

The contributions of Germany demonstrate your commitments towards global health security and solidarity and ensuring that HIV, TB and malaria responses are delivered through investments in resilient and sustainable systems for health for an equitable future for all. The remarkable leadership of Germany in supporting this partnership and approach in global health in the form of multilateral partnerships has enabled us to make the biggest leaps in progress in tackling AIDS-related illnesses, TB and malaria and supported the Global Fund in working with countries to develop long-term and realistic paths for sustainability, as well as during the COVID-19 pandemic which has significantly contributed to improving the lives of communities as well as health systems in low- and middle-income countries. For the Seventh Replenishment of the Global Fund, Germany announced an early pledge of €1.3 billion – a 30% increase from its pledge for the Sixth Replenishment of the Global Fund – and includes €100 million for debt swaps under the Debt2Health mechanism of the Global Fund which aligns with the priorities of Germany – strengthening health and community systems and enhancing resilience and preparedness for future pandemics.

Therefore, with gravest concern, we note the adjustment proposal of the Federal Ministry of Finance for the 2025 budget draft of €100 million, from the originally pledged €950 million to €850 million for the replenishment period of 2026 – 2028. This drastic cut in addition to the planned cuts of €350 million compared to the Seventh Replenishment period amounts to a reduction of 35% which threatens to put 650,000 lives and up to 12 million new, preventable cases of HIV, tuberculosis or malaria at risk, and further weaken health systems in low-income countries.

Therefore, we, communities and civil society living with, affected by and/or vulnerable to HIV, TB and malaria call on Germany to:

- **Build on Germany's ambition during the Global Fund Seventh Replenishment and send a strong signal to the world as we count on your leadership not to go below the previous pledge of €1.3 billion** in a challenging context for global health which will cement your commitment to global health and working with country partners to build a healthier, more equitable world; and
- Rally together with all stakeholders of the Global Fund partnership, using your diplomatic leverage to secure a successful Eighth Replenishment of the Global Fund to raise at least US\$18 billion.

This is because we know that US\$18 billion is the absolute minimum for us to effectively reverse the trajectories for HIV, TB and malaria, but it is not enough to meet our 2030 targets. Funding is falling short at the moment of greatest potential. Without urgent action to close the critical funding gaps in HIV, TB and malaria programmes and strengthen health and community systems, low-income countries could face devastating setbacks and death tolls could spiral. Sustained investment is crucial to avoid a detrimental resurgence of HIV, TB and malaria.

Your commitment towards achieving the SDGs, global health security and solidarity, building sustainable and resilient systems for health, preparing for future pandemics to ensure healthy lives and promoting well-being for all will ensure a successfully resourced Global Fund which is crucial for us as #OneWorldOneFight #MoreNowThanEver!

In solidarity,

Signed on by 284 Organisations Worldwide²
